- AUDIO VIDEO SYNCHRONIZATION: DP1.4 1In 2Out splitter gives you ultra high definition visual experience and two working modes widely used in home theater, studio, work, entertainment and many other occasions
- SPLITTER DISPLAYPORT mode: Supports 8K @ 30Hz, 4K @ 120Hz, 1080P @ 240Hz resolution, offers transfer rates up to 32.4 Gbps and is backward compatible with all previous DP standards. (You need to connect a DP 1.4 cable to enjoy the visual effects.) NB: We recommend that the sum of the input and output cables does not exceed 3 meters, in order not to compromise the signal
- TWO-WAY DP SWITCH mode: The DisplayPort switch allows you to connect two DP sources to a DP display or connect a DisplayPort source to switch between two displays. NB: Two displays cannot be shown at the same time. Requires power supply via USB cable
