Desktop charging solution for educational environments, hospitality and more

Charging and storing devices is easy with the Manhattan 10-Port AC Charging Cabinet. It's the ideal solution for keeping devices ready and secure in schools, restaurants, gyms, doctor's offices, universities, hotels, car rental agencies and more so you can effectively and efficiently assist your students, guests, patients, customers and patrons.

Great for all devices from smartphones to laptops

The AC outlets available on the PDUs safely and securely charge devices such as phones, notebooks, tablets, Macbooks® and more using their power adapters or wall chargers. This cabinet's device-safety circuitry protects your devices against overload, overcurrent, short-circuit and voltage spikes.

Physical security is key

Sturdy, durable steel housing makes it so thieves will have a tough time trying to break in. The security lock can be opened with a four-digit combination or the two included keys. A reversible door helps provide better access to your devices, both to complement the space and confines of where you store the cabinet.

Organized and versatile

Keep your devices organized in the slots that offer plenty of space (400 x 29 x 282 mm each), even for bulky cases. The built-in cable-management clips on the dividers let you structure your charging cables (USB cables are available from Manhattan) for better organization and a cleaner look. The included power cable is removable for better storage.

Wall-mountable and stackable

To create an even more extensive charging solution with a greater number of ports, you can stack up to two cabinets. If you struggle with a small location, simply mount the cabinet to the wall for more room to organize your space.
