Unleash the Power of Voice

The ROG Carnyx is a professional-grade cardioid USB microphone that features a 25 mm condenser capsule and 192 kHz / 24-bit sampling rate to deliver natural and rich sound. The Carnyx offers clean and uninterrupted recordings thanks to a high-pass filter that reduces low-frequency noise, a built-in pop filter to prevent vocal plosives, along with a metal shock mount to minimize external vibrations.

In addition to giving you studio-grade recordings, the Carnyx also features an intuitive one-touch mute button and multi-functional control knob to take your recording and streaming experiences to the next level.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
