Easily extend a High-Definition (HD) signal over an IP network with a single Ethernet cable.

The Manhattan 1080p HDMI over IP Extender Kit is the ideal solution for connecting virtually any digital HDMI source (PlayStation, Xbox, Blu-ray player, satellite receiver, digital recorder, etc.) to an HD display or projector up to 120 m (396 ft.) away using an IP network and a single Ethernet cable. This powered HDMI over IP Extender Kit provides reliable 1080p resolution video and multichannel audio transmission over longer distances than HDMI cables alone. Plus, the transmitter and receiver modules have additional 3.5 mm ports for Infrared (IR) to allow for the control of the source from the display's location.

Flexible Solution for Many A/V Applications

Ideal for trade shows, classrooms, home theatre, conference rooms, business office and retail applications, the Manhattan 1080p HDMI over IP Extender Kit is a cost-effective solution that boosts and extends an HDMI signal to where it's needed. Ethernet cabling - UTP, SSTP or SFTP (cables not included) - is less expensive and easier to install than HDMI cabling and in-line signal repeaters. When used with our Extender Kit, this cable delivers a clear, sharp and vivid picture over longer distances.

Quality Construction and Easy Installation

HDCP compliant with HDMI, the Manhattan 1080p HDMI over IP Extender Kit is tested to guarantee performance and reliability. It installs quickly without having to run software or install additional hardware.
