A silent partner

Thanks to the fanless design and the aluminum enclosure, silent cooling is possible. Thus, making the IB-256WP a silent companion through the daily work. The silicone sleeve protects the enclosure from accidentally slipping off the table or, in a worst-case scenario, from damage.

Well protected

The second line of defense is the write-protection. It can be enabled via switch so the data is protected from accidental editing or even virus infection.

Well connected

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
