Manhattan Toslink Digital Optical S/PDIF Audio Cable. It transmits superior high-definition surround sound between AV components with fiber-optic interfaces. Rediscover your favorite movies, music and video games with crystal-clear audio. This optical audio cable is ideal for all devices with an optical interface such as AV receivers, (pre)amps, soundbars, sound systems, TVs, PCs, DACs (digital-to-analog converters), PlayStation® (PS3/PS4/PS4 Pro), Xbox® (One/360) and more.

State-of-the-art transmission technology plus gold-plated contacts

The cable's high-grade optical fiber and polished lens allow for the best possible performance without compromising sound quality. Its construction from fiber strands makes it completely immune to electromagnetic interference (EMI) and radio frequency interference (RFI) that lower-quality HDMI cables can suffer from. Gold-plated contacts keep your connections always corrosion-free.
