R7,418

HOTWAV Cyber 16 Pro smartphone (black)

Add energy to your adventure with the HOTWAV Cyber 16 Pro – a smartphone that combines rugged construction with modern technologies. Equipped with an octa-core MediaTek Helio G100 processor manufactured using 6 nm technology, it ensures smooth operation even when performing demanding tasks.

Compact design without compromise

The device offers an exceptionally slim and lightweight design in its class of rugged smartphones. With a thickness of only 12.8 mm and a weight of approximately 300 g, the phone fits perfectly in your hand, ensuring comfort during everyday challenges and extreme adventures.

Reliability confirmed by standards

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The smartphone meets IP68, IP69K, and MIL-STD-810H resistance standards. These certifications guarantee full water and dust resistance and confirm the device's readiness to operate in extremely harsh environmental conditions. This device is designed to accompany you in every situation – from the dynamic rhythm of everyday city life to the most demanding outdoor expeditions.

Innovative rear panel for enhanced usability

The device is equipped with an innovative additional touch screen on the rear cover, which seamlessly extends the everyday usability of the smartphone. The auxiliary display provides instant previews of notifications from WhatsApp or Telegram and convenient call handling without activating the main screen. In demanding outdoor conditions, an additional advantage is the ability to use the built-in compass directly on the rear display, which provides practical support during navigation.

Smart selfies and full multimedia control

The rear screen opens up new possibilities when taking photos. It allows you to take selfies with the main camera while previewing the frame directly on the secondary display. This solution allows for significantly better photo quality and greater control over the shot. A single touch is also enough to control music playback – change tracks, pause or resume playback without having to reach for the main screen.

Modern energy management for everyday use

Operating the additional screen is extremely simple – it can be activated or deactivated with a single press of the side button. The "lift to wake" feature automatically activates the panel when you turn your phone, and full synchronization with the system ensures consistent operation of both displays. This solution reduces energy consumption and significantly improves the smoothness of everyday use.

A unique style tailored to every physical activity

An extensive library of sports watch faces allows you to instantly personalize the additional screen, making it easy to customize its appearance to suit your current needs, emotions, or activity. A variety of graphic themes not only give the smartphone a modern look, but also allow you to quickly

check the current time, date, battery level, and number of steps taken, ensuring constant access to the most important information. It's the perfect combination of striking design and practical everyday functionality.

Versatile day and night camera system

The smartphone is equipped with an extensive set of cameras that allow you to capture every moment regardless of the conditions. The 108 MP main lens allows you to take detailed, clear photos with a wealth of detail, proving itself in both everyday shots and more demanding scenes. This is complemented by a 24 MP camera with night vision, which allows you to take photos in very low light and after dark, which is a significant help during nighttime activities and outdoor expeditions. The set is complemented by a 5 MP macro lens for close-ups and a 32 MP front camera for high-quality video calls. It is a complete optical system designed for day and night use.

Exceptional screen smoothness

The 6.6-inch display with a resolution of 1080 × 2408 px provides a precise image and a large workspace. The 120 Hz refresh rate guarantees exceptional animation smoothness and comfortable content viewing, making the use of applications natural and enjoyable in everyday use. The use of Corning Glass effectively protects the screen from scratches and damage, making the display well-suited for both everyday use and more demanding conditions.

Convenience and security in one device

The HOTWAV Cyber 16 Pro uses Android 15 and Google Gemini technology, giving users access to innovative AI features that streamline every task. Privacy is guaranteed by two independent systems: biometric facial recognition and a fingerprint reader integrated into the side button. The smartphone supports a mobile lifestyle with an NFC module for contactless payments and Dual SIM 4G support, allowing you to conveniently combine your private and professional life in one device.

Included in the box

- Smartphone
- 33W mains charger
