The GS980MX Series of stackable Layer 3 Lite switches feature high capacity, resiliency, and easy management. With Multi-Gigabit ports and Power over Ethernet, and available in both compact and high port density models, they provide an ideal choice for high-speed connectivity at the network edge.

- Support high-speed Wi-Fi 6 solutions, and network upgrades over legacy cabling, with 2.5G and 5G connectivity (PoE models)
- Connect and power endpoints such as IP phones, wireless APs, and more with up to 30 Watts of PoE+
- Support high-power devices such as outdoor PTZ cameras with heaters/blowers and enhanced lighting controllers, with up to 90 Watts of PoE++ (10 and 18 port models)
- Build a resilient network with the ability to stack multiple units using VCSStack™
- Extend network reach in distributed environments using long-distance stacking
- Reduce costs and automate network management with Autonomous Management Framework™ Plus (AMF Plus)
