Fans of UNO card games will love the UNO Quatro family game which combines the challenge of getting four-in-a-row with the strategy of matching colour or number. On their turn, players slide their tiles into 1 of the 7 trays, strategically trying to maneuver the tiles to get four-in-a-row. The tiles must touch another tile with either the same colour or number, and special Action Tiles change the game by making other players work with fewer tiles, pushing a tile out of a tray, and even swapping the position of two trays! Makes a great gift for UNO fans and game lovers ages 7 and up.
