Lenovo T75 one-suite collaboration solutions are designed for medium meeting rooms according to different sizes. It helps to cast meeting content on the 4k vast displays and restore vivid colour wired or wirelessly. Thanks to the smooth touch function and solution, users can annotate on the presented content or freely write on the built-in whiteboard. Moreover, users can instantly conduct video conferences by starting preloaded meeting applications and freely communicate with remote sites using the AI-powered camera and microphones in the solution.
