Bring gaming worlds to life

Adaptive Triggers

Experience varying levels of force and tension as you interact with your in-game gear and environments. From pulling back an increasingly tight bowstring to hitting the brakes on a speeding car, feel physically connected to your on-screen actions.

Haptic Feedback

Feel physically responsive feedback to your in-game actions with dual actuators which replace traditional rumble motors. In your hands, these dynamic vibrations can simulate the feeling of everything from environments to the recoil of different weapons.

DualSense® Wireless Controller - ASTRO BOT™ Limited Edition

Whizz through the galaxy with this limited-edition DualSense wireless controller, inspired by the dynamic design of ASTRO's trusty Dual Speeder spaceship.

Choose your style

Personalise your set-up and add more players to the mix with an additional DualSense wireless controller.

A gaming icon in your hands

Take control with an evolved, two-tone design that combines an iconic, intuitive layout with enhanced sticks and a reimagined light bar.

Haptic Feedback

Responsive vibrations react to your in-game choices and simulate environmental factors in select PS5 games.
