

Bosch AdvancedDrill 18 1350 RPM Keyless 1 kg Green

Model: 06039B5009

Manufacturer: BOSCH

EAN: 4053423224795

Product Code: 1608311

R3,401

Cordless AdvancedDrill 18 with intuitive user interface for amazingly easy use

This cordless drill driver is exceptionally intuitive and highly versatile. Choosing the desired mode for automatically matching gears to screwdriving or drilling is easy. The rotation direction can be changed with one simple click due to the innovative electronic switch system with an indicator LED light. Its brushless motor delivers power, compactness and endurance. A magnetic cap for screwdriving and a 13-mm chuck for drilling make changing between applications even more simple. The AdvancedDrill 18 allows for tackling a variety of jobs in wood, plastics and metal. The tool belongs to the POWER FOR ALL ALLIANCE. One battery can operate a large variety of tools from

different brands.

POWER FOR ALL cordless systems from Bosch

Whether drilling, cleaning or gardening. Switch quickly and easily between different devices with the 18 V POWER FOR ALL battery from Bosch. For even more flexibility the battery fits also in tools of other POWER FOR ALL battery alliance partner

Impossible to choose the wrong mode

The intuitive mode selection makes changing between screwdriving and drilling easy. Gears are automatically adjusted according to the selected working mode to perfectly fit each job.

Always work in the right direction

The easy-to-handle innovative switch system comes with an indicator LED light and clearly shows if the tool is spinning forwards or backwards. If the tool has been in standby for a while, it starts in a forward direction.

Endurance and power

The brushless motor combines a significantly longer service life with more power. Electronically operated, it reduces heat, is contactless, wear-free and works with maximum efficiency, while its compactness enables a lighter and easier-to-use tool construction.

Holds screws in place for one-hand use

The magnetic cap automatically holds screws in place, so one hand is free to hold workpieces for more flexibility and freedom while working.

Quick adapter changes for fast work

The QuickSnap interface allows for fast changes between the drill chuck and the magnetic cap to quickly switch between drilling and screwdriving.

Accessories are always at hand
