- Product dimensions: 262x216x16mm
- Product weight: 680g

3Doodler is one of those fantastic ideas that seem so obvious in hindsight that it's hard to believe that they are only now being implemented.

The premise is simple: the pen draws with molten filament, which makes it possible to build 3D objects in the same way as a 3D printer, but without creating computer models.

Using the 3Doodler pen is incredibly simple. To start creative fun, just place the selected color of filament in the guide and after a while you can start creating. You are only limited by your creativity!

Creating with 3D printing has never been so easy and enjoyable!!!
