Deploy multiple Ethernet cable terminations in rack-mounted network setups, using this 24-Port 1U Blank Keystone Patch Panel with Cable Management Bar. It is designed for high-density installations such as wiring closets and data centers, where modular port configuration and clean cable routing are key to long-term serviceability.

Versatile Connectivity

The 1U keystone patch panel supports standard shielded (STP) and unshielded (UTP) RJ45 keystone jacks, allowing each port to be configured to match your cabling type and installation standards. Numbered port labels along the front panel ensure quick identification for troubleshooting and routine maintenance.

Durable Construction

The steel housing features a black powder-coated finish for scratch resistance and long-term durability. An integrated cable management bar with tie-down slots helps reduce cable strain, while the included grounding wire supports proper termination for shielded installations.
