Product Code: 1608898

R2,450

LOKITHOR J1350 Pro 25.6Wh Jump Starter

The LOKITHOR J1350 Pro is a compact and powerful jump starter with a peak current of 1350 A, equipped with a 25.6 Wh LiFePO4 battery, designed to start gasoline engines up to 6.5 L and diesel engines up to 3.5 L. The technology used ensures over 2,000 charge cycles, a high level of safety, and a long service life, resulting in cost savings during use. The model features intelligent safety protections and the CONNECTMAX system, which optimizes the starting process, ensuring reliable operation in various conditions. Thanks to its compact dimensions and lightweight construction, it is suitable for both everyday use and professional applications.

High starting power and broad compatibility

The unit offers a peak current of 1350 A, allowing for quick and effective starting of passenger cars, SUVs, and commercial vehicles. The starter easily handles gasoline engines with a displacement of up to 6.5 liters and diesel engines up to 3.5 liters, making it a versatile solution for private users,

workshops, and construction sites alike.

LiFePO4 Technology - Durability and Safety

The use of LiFePO4 cells significantly extends the device's lifespan, enabling over 2,000 charge cycles. Compared to traditional batteries, this solution is more chemically stable, which reduces the risk of overheating, ignition, or damage. Additionally, the device can remain in standby mode for up to 24 months without needing to be recharged.

Smart safety features for complete protection

The starter is equipped with advanced terminals featuring as many as ten protection systems that ensure safety during use. These include protection against reverse polarity, overload, and short circuits, which helps prevent errors during connection and protects both the device and the vehicle's electrical system.

CONNECTMAX Technology - Maximum Efficiency

The CONNECTMAX system analyzes the resistance of the terminal connection and automatically adjusts operating parameters to ensure optimal starting efficiency. As a result, the device operates stably and effectively even under demanding conditions, eliminating the risk of a failed engine start.

Compact design and portability

The LOKITHOR J1350 Pro was designed with ease of use and transport in mind—its compact dimensions (approximately 190 × 90 × 45 mm) and weight of less than 1 kg mean it fits easily in a trunk or car glove compartment. A rugged IP65-rated housing effectively protects the device from dust and splashes, allowing for safe use even in harsh conditions. This model also offers a power bank function thanks to USB-C (up to 30 W) and USB-A (up to 18 W) ports, enabling fast charging of mobile devices such as smartphones and tablets. An additional convenience is the clear LED indicators, which show the charge level, connection status, and any errors, enhancing the convenience and safety of use.

Ready to go in any situation

Thanks to its built-in LiFePO4 battery, the device is ready to go whenever you need it. It performs well not only in everyday emergencies but also in more demanding environments, such as workshops or construction sites, offering reliability and peace of mind.

Included in the set

- Engine jump starter
- USB-A to USB-C cable
- USB-C to USB-C cable
- Engine jump starter clamps
- Storage bag
- User manual

Manufacturer	LOKITHOR
Model	J1350 Pro
Battery capacity	25.6Wh (2000mAh)
Product dimensions	3.54" (depth) × 6.89" (width) × 7.48" (height)
Product weight	908 g
Current	1350 A
Maximum peak current	1350 A
Weight	650 g
Battery	1 × LiFePO4 battery (included)

Water resistance rating IP65
