Manufacturer: GLORIOUS

EAN: 810069970004

Product Code: 1608958

R837

GMMK PRO Switch Plate

OPTIMIZE YOUR TYPING EXPERIENCE

UPGRADE LIKE A PRO

Swapping out your GMMK PRO's switch plate is a popular modification which allows you to take full control over your typing experience. Each switch plate material carries different properties of sound and feel which will vary depending on your switch of choice.

Swapping out the GMMK PRO's default aluminum switch plate is quick and easy - all you need is a screwdriver. Experiment with different materials until you find the one that perfectly complements your switches and build.

SUPER-STURDY BRASS

Let your switches sing. Tailor your GMMK PRO by using the brushed-gold brass plate. This rigid material creates a higher, musical tone when your switch strikes the plate or “bottoms out.” Additionally, brass’s firmer nature gives switches a super-solid feedback experience that feels just right.

NOTE: Some 3rd party stabilizers (such as Durock) may not fit without slight modification.

ULTRA-FLEXIBLE POLYCARBONATE

Polycarbonate accentuates the feel of your switches, creating a deeper, fuller sound while delivering that thockiness you crave. This translucent plate delivers a satisfyingly smooth typing experience.
