R717

A new breed of linear has arrived.

Silky smooth and perfectly precise, this premium mechanical switch will ascend your typing experience with its fast and fluid operation.

The Lynx's globally-sourced materials and tight engineering tolerances guarantee a satisfying, consistent actuation for both typing and gaming.

Once you try them, you won't be able to keep your hands off of them.

The Glorious Lynx is made with uncompromised quality. Below is a full breakdown of each component.

Top Shell - Unique, light blue polycarbonate top housing with Glorious branding

Stem - Soft and flexible POM stem provides an unbelievably smooth operation

Spring - Unique, factory-designed spring with nickel plating, sourced from Korea

Leaf - Premium grade copper, sourced from Japan

Bottom Shell - High-quality nylon bottom housing, sourced from Belgium

LUBED

Lubed Glorious Lynx switches come with G-Lube expertly pre-applied to the upper housing, spring, and stem of each switch. Perfect for someone who is looking for fully optimized sound and performance right out of the box - no prep time or disassembly needed.

Compatible with all GMMK models

Glorious Lynx switches are compatible with all GMMK models, backlight RGB, and all mechanical keyboard keycaps. To be compatible with the GMMK 1, you need to clip the switches' legs prior to installation.
