R1,398

The Lindy HDMI Port Blockers are useful little devices that can be used to physically prevent access to HDMI ports. With the HDMI Port Blocker Key, the user can quickly block any open device ports and easily prevent users from connecting cables, devices or inserting foreign objects without permission.

The semi-permanent HDMI Port Blocker is made up of a moulded plastic blocking cap that plugs securely into the HDMI port with a special insertion key. The blocker latches into the port just as a normal HDMI cable would and remains in place until removed using the insertion key.

Designed to help protect against unauthorised access to a network or system, as well as preventing unintentional or malicious damage to ports. It can also act as a visual cue, showing inactive or disconnected ports, ideal for use in schools, office or other public sector environments.

The key not only acts as the insertion and removal tool for the HDMI Port Blockers but also serves as a compact storage solution, ideal for IT administrators or facility managers managing multiple

devices. This all-in-one design adds an extra layer of convenience to an already practical and efficient physical security tool. Up to four HDMI port blocks can be conveniently stored inside the specially designed key, making it easy for users to carry multiple blockers and use them as needed.

To use, simply attach a blocker to the key and insert it into the HDMI port. Release the sliding mechanism on the key to leave the blocker in place. To remove, simply insert the key back into the blocker and pull away.
