LogiLink WZ0015P network cable tester Black

Model: WZ0015P

Manufacturer: LOGILINK

EAN: 4052792042498

Product Code: 1611900

R882

LogiLink’s Network Cable Tester is the best choice for budget oriented installers and service engineers. With this tester, the installer finds any basic cabling problem very quickly. This cable tester has many features; basically it is ideal for testing cables including Cat5, Cat6, Cat7 as well as Coax and Telephone cables. LogiLink’s Network Tester is suitable for RJ45, RJ11, RJ12 and BNC connectors. This set is equiped with LogiLink’s POE finder which reviews and determines if a network cable or port is providing Power-over-Ethernet or not. The POE-Finder indicates whether the PoE is active on the endspan (1-2/3-6) or midspan (4-5/7-8) pairs.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice.
