

APC Automatic Transfer Switch AP4423A - (8x) C13 + (1x) C19, 3680W, Rack mountable, 1U

Model: AP4423A

Manufacturer: APC

EAN: 731304432449

Product Code: 1613074

R24,700

Increase availability

An APC Rack Automatic Transfer Switch makes it possible to connect single-powered hardware to two different power sources, in order to increase the availability of this connected hardware and prevent costly downtime. Because an APC Rack ATS uses two input power cords (not included), it can be connected to two different power sources at the same time. By then connecting single-powered hardware to the Rack ATS, this hardware can have access to 2 separate power sources. If one source fails, the Rack ATS immediately switches to the second feed, without the connected hardware being affected.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Easy to use

You can read the status of the APC Rack ATS at a glance via the front panel interface, but you can also manage it remotely thanks to its built-in network management functionality.

Convenience

Because this Rack ATS is equipped with multiple outputs, multiple single-powered devices can be connected to the ATS at the same time, so that all benefit from the security of two feeds.

Safety

The built-in intelligent interface allows this APC rack ATS to monitor both input power sources, detect deviations in voltage or frequency and then take a user-defined action, such as sending an alarm or switching.

Accessories

Connect the APC ATS using 2x the AP9875, (C19-Schuko), AP9876 (C19-IEC309 16A) or AP9877 (C19-C20) and provide the ATS with a temperature and humidity sensor (AP9335TH). You can prevent loose power cords with a retention bracket the AP7769.

Warranty extension

The factory warranty of this APC Rackmount Automatic Transfer Switch is 2 years and can be extended to 3 years using WBEXTWAR1YR-AC-03.

Features

APC Rack Automatic Transfer Switch AP4423A

Input: 230V, input connection type: C20 (2x)

Output 230V, output connection type: C13 (8x) + C19 (1x)

Max power: 3680Watt
