Optimal Wi-Fi Range for Extra Rooms

The high-gain antennas with advanced active and passive Beamforming technology offer stronger, more focused Wi-Fi signals towards client devices, delivering faster speeds and greater stability throughout your home or office.

OFDMA with Multi-RU and Puncturing

Connect 200 Devices and Stay Fast

The upgrade OFDMA in Wi-Fi 7 features Multi-RU that provides smarter frequency allocation to improve capacity. The Preamable Puncturing technology makes the most of available channel resources to keep connections fast regardless of interferences in other channels.

Easy Setup and Versatile Management

Easy to Use

Upgrade your network with ease. An intuitive setup wizard guides you to config your new network.

Parental Controls

Create user profiles, set online times, and regulate online content for your loved ones.

VPN Server and Client

Enables work from home and secure remote access with the support of popular VPN protocols.

Cudy App

Features Cudy App and Cudy Cloud to facilitate your network management.
