Product Code: 1617529

R1,537

Compact multi-device keyboard with Mac layout

The CHERRY KW 7100 MINI BT FOR MAC is a space-saving Bluetooth® keyboard with Mac layout. The compact dimensions, multi-device functionality and its own carrying case make it an ideal companion for mobile users.

The battery-powered keyboard offers the possibility to connect up to three different devices simultaneously via three Bluetooth® 5.1 channels. Once the respective pairing is done, you can easily switch between the connected devices using the F1, F2 and F3 keys. The Mac version is compatible with almost every Bluetooth®-enabled MAC OS, or iOS device.

The CHERRY KW 7100 MINI BT FOR MAC is based on the inhouse CHERRY SX scissor mechanism, which guarantees optimum typing quality and precise inputs. The concaveshaped keys enable fatigue-free and low-noise typing. The durable and abrasion-resistant key legends also impress when it comes to sustainability.

The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

With its minimalist design, the keyboard takes up little space, making it ideal for limited work spaces, whether at a desk, in college, or on the train. An additional ergonomic advantage of a reduced key layout is that the mouse arm moves closer to the keyboard. This can then lead to an optimized shoulder posture and prevention of tension. The typing angle can also be adjusted by folding the integrated stand-up feet in or out

Although the CHERRY KW 7100 MINI BT FOR MAC is a compact keyboard, it offers numerous special functions. Among other things, Bluetooth® channels, brightness control, volume control and multimedia functions such as play/pause and track selection can be activated by simple key combinations. The FN key can even be fixed to allow permanent use of the actual F-key functions. Status LEDs are integrated in certain keys to see at a glance which special functions are activated, which BT channel is currently in use and whether caps-lock key is activated.

The keyboard comes in a completely plastic-free package that includes 2x AAA lithium batteries as well as a black carrying case made from recycled plastic. This keeps it safe and protected - perfect for mobile working and living.

The CHERRY KW 7100 MINI BT FOR MAC impresses with a compact design, multi-device functionality, ergonomic benefits and high-quality typing action. It presents itself as an equal alternative to a full-size keyboard with the same performance and functionality - just without a number pad.
