

Thrustmaster AVA F/A-18 Super Hornet Black USB Flightstick PC

Model: 443377

Manufacturer: THRUSTMASTER

EAN: 3362932915782

Product Code: 1621513

R11,906

Take control of the AVA F/A-18 Super Hornet, carefully designed to meet your needs and preferences, offering you a multitude of tailor-made configurations. Combined with the F/A-18 flight stick, unleash your full piloting potential without any limits thanks to AVA (Advanced Versatile Aviation) and engage in high-intensity aerial combat.

Under the hood

A WORLD OF FLIGHT CONFIGURATIONS

Create your ideal configuration from a multitude of adjustment possibilities offered by the various interchangeable elements of the AVA base: the axis curve, via cams; the resistance, via springs; the travel, via different deflection mask sizes; and the damping, via a damper.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

THE ART OF ADJUSTMENT, MADE SIMPLE

The AVA base's design has been created to make it quicker and easier to modify the settings of the internal elements. Make the final adjustments without disassembling the base, thanks to "on-the-fly" accessibility allowing you to adjust the stick's resistance.

SUPERIOR PILOTING PERFORMANCE

Enjoy optimal precision and center point behavior thanks to the combination of two cutting-edge technologies. First off, by way of integration of two AXY (Accurate X&Y) sensors, allowing for precise and independent adjustment of the center point, progressiveness and resistance. Secondly, via proprietary H.E.A.R.T magnetic technology, ensuring maximum precision.

OFFICIAL REPLICA OF THE F/A-18C HORNET FLIGHT STICK

Take control of the Super Hornet with this accurate 1:1-scale replica of the F/A-18C Hornet™ flight stick, developed under official Boeing license. Its metal structure captures the original handling sensations, ensuring total immersion in games. Featuring a panel of 19 action buttons, including an ultra-realistic 2-step trigger and an 8-direction hat switch, the F/A-18C Hornet flight stick is an incredibly powerful weapon to help you dominate the skies.

READY FOR TAKEOFF

Get flying in a flash with the extra AVA F/A-18 Super Hornet Flightstick add-ons included in the box: the "Super Hornet"-stamped AVA metal plate for desktop use, and the offset adapter that allows the grip to be adjusted to 15°/30° for enhanced realism and comfort.

THE FUTURE OF FLIGHT SIMULATION

Explore the range of possible configurations of the scalable AVA base, thanks to its vast ecosystem of current and future accessories (additional grips, extensions, cams, springs, dampers, cyclical brake...).
