Turn your racing wheel into a heavy vehicle driver's cabin with the SimTask Steering Kit. SimTask is Thrustmaster's new range of driving simulators for heavy vehicles and farm machinery. The SimTask Steering Kit is a racing wheel mount that allows you to set your racing wheel in a flat-mounted position, ideal for a realistic, immersive experience when operating heavy machinery and vehicles. The rotary steering wheel knob offers enhanced agility, enabling you to operate a joystick or a shifter with your other hand. Quickly switch from driving race cars to operating heavy vehicles and farm machinery, with the ability to easily adjust your racing wheel's angle and height. Take on the toughest terrains with confidence: with its metal structure, the SimTask Steering Kit is sturdy and built to last.

The SimTask Steering Kit mounting system is compatible with Thrustmaster's T128 and T248 racing wheels.

DESIGNED FOR HEAVY VEHICLE DRIVING SIMULATIONS

The SimTask Steering Kit is the ideal racing wheel mount for driving simulations based on heavy vehicles and farm machinery. Place your steering wheel flat to enjoy a realistic, immersive experience when operating heavy machinery and vehicles.

GROUNDBREAKING VERSATILITY

The steering wheel's position can be adjusted over three axes: easily adjust the wheel's angle and height without requiring tools or disassembly. Quickly switch from one position to another, from driving racing cars to operating farm machinery, heavy vehicles and combine harvesters.

ROTARY SPINNER KNOB

The SimTask Steering Kit includes a rotary spinner knob allowing the one-handed operation of heavy machinery, for enhanced agility. You can then use your other hand to operate equipment controls or a shifter.

STURDY METAL STRUCTURE

Featuring a 100% metal structure made from 2 mm thick sheet metal, this mount ensures robustness and the faithful restitution of driving sensations. The rotary spinner knob features a steel axle, ensuring stiffness and an extended service life.

EASY DESKTOP MOUNTING

The SimTask Steering Kit is equipped with a clamp attachment system suited to desks ranging from 15 mm to 50 mm in thickness. The rotary spinner knob can easily be mounted onto the steering wheel, without tools.

COMPATIBLE WITH THE T128 AND T248 RACING WHEELS

The mounting bracket is compatible with Thrustmaster's T128 and T248 racing wheels. Turn your desk into a real-life versatile cockpit!

For an even more complete farm machinery driving experience, the SimTask Steering Kit is the perfect complement to the SimTask FarmStick.
