Desktop Charging Station - smart and fast power for USB-C and USB-A devices

The Manhattan 10-Port USB Charging Station keeps USB-powered devices - tablets, phones, cameras, Bluetooth headphones and portable game consoles - charged and ready to go. It plugs into any standard wall outlet and offers rapid charging, so it's perfect for home, school and office use. To help with organization, ten wide bays fit most devices in their cases, keeping the countertop clean and clutter-free. That means everything can charge in one place, without having lots of chargers plugged into a power strip or devices spread all over your desk. It also means you'll have some freed-up USB chargers to stow in a bag for when you need to charge devices away from home or the office.

Safe and high-powered charging on 10 ports simultaneously

This charging station is ultra-powerful with 10 ports pumping out a total of 120 watts of power, which means simultaneous higher-powered multi-device charging. An adaptive smart chip detects and delivers the optimal charging current for connected devices. Three USB-C Power Delivery (PD 3.0) ports deliver up to 18 W per port so newer iPhones®, iPads®, Samsung® Galaxy Tabs and other PD devices can have full batteries in a short amount of time. The other seven USB-A ports fast-charge devices with power up to 12 W / 2.4 A per port. All ports feature smart, built-in safety measures to prevent short-circuits, over-voltage, over-current and overheating.

Great for families and offices

Tech-savvy families often own two or more mobile devices per family member, with big charging needs. Bring them together with this extensive charging solution and enjoy a phone-free dinner table. In offices and conference rooms, it gives your co-workers access to charging when they need it.
