Yealink MeetingBar A25 is built on the Android 13 operating system and will continue to receive future upgrades, ensuring users have access to the latest features and enhancements. In addition, it is compatible with Microsoft's MDEP, which enhances security and deployment experiences. This integration provides users with a more secure environment and streamlined deployment processes, contributing to a smoother and safer user experience.

Moreover, Yealink MeetingBar A25 features a direct connection to the CTP25, enabling a simplified login process. This streamlined login experience saves users time and enhances convenience.

An Advanced Triple-Camera System

The advanced triple-camera system achieves a 151° ultra-wide field of view, enabling capture of all attendees in Focus Rooms. At the same time, it provides high-definition portrait close-ups, capturing every detail of interaction and enhancing the meeting viewing experience for remote participants.

High-Quality Audio Pickup Experience

The Yealink MeetingBar A25 features a 5-meter voice pickup range, integrating a high-quality loudspeaker, 3-meter full-duplex technology, and an 8x MEMS microphone array, delivering exceptional sound playback and voice pickup performance. Its built-in intelligent noise reduction technology ensures a superior audio experience for meetings.

Compatible with Microsoft's MDEP

Yealink MeetingBar A25 is compatible with Microsoft's MDEP, which enhances security and deployment experiences. This integration provides users with a more secure environment and streamlined deployment processes, ultimately improving the overall user experience.

Simple Deployment

Yealink MeetingBar A25 features a direct connection to CTP25, enabling a simplified login process — only one login is needed. This streamlined login experience saves users time and enhances convenience.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Multi-Platform Flexibility

Yealink MeetingBar A25 supports native Teams Rooms, Zoom Rooms, and more. It also supports BYOD. In BYOD mode, MeetingBar A25 can serve as video and audio peripherals for your computer in meetings via third-party applications.

*Wired BYOD is achieved through CTP25. Direct BYOD connection to the device body will be supported through future software updates.

Remote Device Management

Yealink MeetingBar A25 can be networked and reported to the device management platform, allowing remote management, configuration, and upgrades.
