The 5 Nm of constant torque has an overshoot capability of +100% to vastly increase its power, and deliver super-boosted effects with ultra-low latency of 5 ms. HARMONY technology generates high-frequency vibrations to feel all the physics of the game, down to the smallest details. Rumble strips and tire screeching have never felt so impactful.

RACE DASH SCREEN

Adjust settings and save your profiles directly via the Race Dash screen. More than 10 settings are configurable, including the innovative GEAR JOLT to feel gear shifting in the wheel rim*.
In games, Race Dash displays more than 10 items of race information* such as speed, best time, position or race flags.

DETACHABLE SPORTCAR WHEEL RIM

Featuring a sporty and versatile design, the 11.8-inch / 30-cm wheel rim with rubber grips adapts to all simulation styles. Its mag-shift paddle shifters with clear, precise activation enhance the sporty driving style. The multifunctional encoder lets you freely assign 12 additional game actions, to keep your favorite functions at your fingertips. Thanks to its extremely lightweight design (1.8 lb / 811 g), you'll really feel all of the motor's power!

SCALABLE METAL PEDAL SET

Raceline Pedals LTE (Long Term Evolution) features 2 pedals with H.E.A.R.T. sensors, ensuring accuracy and longevity. Customize the firmness of the pedals thanks to the different springs included, and the 3 adjustment notches behind each pedal. The non-slip pads stabilize the pedal set on the floor. The pedal set can be upgraded with a third Load Cell pedal thanks to Raceline Pedals Upgrade Kit (sold separately, available soon).
