Thanks to a pre-shaped lens and/or reflector the beam provides the optimal light output and focus.

Shock resistant housing withstands damage caused by shocks

A special shock resistant plastic or rubber housing prevents damage to your torch caused by shocks.

Nylon strap prevents you from losing your torch

This strap makes the torch easy to carry around and prevents it from falling if it accidentally slips out of your hand.

Rubber housing protects torch from splashing water

Rubber sealing rings and housing prevent water causing damage to the torch and allow you to use it in all weather conditions.

Anti-roll bar stops your torch rolling away on a slope

A special shape in the housing of the lamp makes sure it will not roll away on a sloping surface and thus always keeps your torch close at hand.
