Kensington Slim NanoSaver 2.0 Portable Keyed Laptop Lock

Model: K65025WW

Manufacturer: KENSINGTON

EAN: 85896650256

Product Code: 1629912

R2,269

With today's slim laptops with Nano security slots, a typical cable lock head may fit, however the lock can be thicker than the laptop itself. This can prevent the device laying flat, unevenly raising it off the desktop. A redesigned version of the innovative Slim NanoSaver® Laptop Lock, the Slim NanoSaver® 2.0 Portable Keyed Laptop Lock features a smaller lock head, with the locking cleat positioned low and the key cylinder up high and out of the way. This careful sizing and positioning of components has created a premium locking solution that won’t block ports and allows ultra-thin and 2-in-1 laptops with nano lock slots to lie flat and stable. Verified and tested for industry-leading standards in torque/pull, foreign implements, lock lifecycle, corrosion and other environmental conditions, the Slim NanoSaver® 2.0 Portable Keyed Laptop Lock features an easily transportable self-coiling carbon steel cut-resistant cable that stretches up to 1.8m (6') and shrinks down to 76mm (3). The cable is wrapped in a protective sheathing to help keep attachment points such as desks and tables free from scratches. Additional features include a 5mm keying system, common across all of Kensington’s latest locks so there’s only one keying system to manage, while the smaller key opening helps thwart picking attempts. Register & Retrieve™, Kensington’s online key registration
