R1,689

Imou Cell Go Full Color

The Cell Go Full Color wireless battery camera secures your home in no time. Easily place and install this camera anywhere you want. The camera's 5,000 mAh battery lasts a long time under normal conditions so there is little to worry about here. Enjoy high image quality thanks to the 2K QHD resolution. Even at night, the Cell Go Full Color shows clear images thanks to its smart night vision technology. Furthermore, this security camera features person recognition, built-in siren and two-way conversation with voice diverter. The IP65 certification makes the camera suitable for any weather condition.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Image quality

The 2K QHD resolution, or 3-megapixel resolution, offers premium image quality to keep an eye on a front yard, backyard or garage. The applied H.265 image compression technology ensures that high-quality recordings and streams take up relatively little space and thus require less bandwidth. In this way, the available storage space and bandwidth can be used optimally.

Long battery life and solar panel

The Cell Go Full Color's 5,000 mAh battery lasts up to 120 days on a full charge under normal usage conditions. When battery levels are low, remove the battery from the camera to recharge. The Cell Go Full Color kit comes with an Imou solar panel. By connecting the camera to 3W solar panel, there is a continuous power supply and no need to worry about charging the battery (depending on usage conditions).

Human detection and two-way talk

The Cell Go Full Colour accurately recognises persons based on AI detection. Combined with PIR detection, false alarms can be effectively prevented. Upon detection, you can choose to activate the built-in siren to keep unwanted visitors at an appropriate distance. Furthermore, the security camera features two-way communication with voice diverter using the built-in speaker and microphone. With the voice diverter, you can more effectively scare off unwanted visitors.

Full Color night vision

This surveillance camera offers optimal security even in the evening hours thanks to its various smart night vision modes. 1. Smart night vision: when it gets dark, the camera uses infrared to display greyscale images. As soon as the camera detects a person, the built-in spotlights are activated to record in colour. 2. Colour night vision: when it gets dark, the camera activates the built-in spotlights to record images in colour. 3. Infrared night vision: when it gets dark, the camera uses infrared for greyscale images. 4. Night vision off

Installation

Download the Imou Life app (iOS, Android or Windows) and create an Imou account. After logging in, select the “+” sign at the top right of the Imou app to add a camera. Scan the QR code on the camera and follow the steps in the app. Next, select the Wi-Fi network (2.4GHz/5GHZ) and make sure the camera is close to the router during the installation process. The camera will be ready to use in no time.

Practical features Imou Life app:

- Smart scenes: set smart scenes such as away mode where the camera is fully active
- Time-lapse recording function: easily capture beautiful events such as a sunrise
- Detection region: select in which zone the camera is active
- Customised security: Choose from several operational options including for power saving
- Privacy mode: Camera goes into standby mode to ensure privacy
