Share Screens in 4K

Share My Screen 4K is a game changer, providing crisp, clear 4K resolution at 30Hz for presentations, streaming, and gaming without the clutter of cables.

Present what's on your smartphone, tablet, or laptop screen wirelessly in 4K resolution to your monitor, TV, or projector. Share My Screen 4K is your wireless solution for any situation, whether you're presenting in the boardroom or the classroom, or watching videos, sports, or gaming at home.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Simply Plug and Play

Share My Screen's Dual Screen Output allows you to mirror your display. Connect the transmitter to your device via USB-C, and the receiver to your monitor, TV, or projector via HDMI. It's plug and play and effortless to pair, while ensuring universal compatibility with a wide range of USB-C enabled devices.

With a reliable 10-metre wireless range, you can enjoy the flexibility and freedom to move around your space without losing signal quality.

Compact and Portable

The compact and stylish design of Share My Screen 4K makes it easy to carry with you, giving you the flexibility to set up and present anywhere, at any time.

It's also worth noting that there are more connecting options with the transmitter's extra USB-A port, which you can use to link up other essential devices like your mouse, keyboard, or external memory.
