Fujitsu Windows Server 2025 Standard Base License, 16 Core, ROK 1 license(s)

Model: PY-WBS7RA

Manufacturer: MICROSOFT

EAN: 4066733355448

Product Code: 1637512

R24,675

Enhance your infrastructure's versatility with the next generation of the most powerful server operating system.

In the ever-evolving landscape of modern business, IT has transitioned from a support role to a driver of innovation. Data are at the heart of this transformation, and the synergy between PRIMERGY Server and Windows Server 2025 empowers organizations on their digital journeys.

Digital transformation is all about harnessing technological advancements not just to streamline processes, but also to fundamentally revolutionize them. Windows Server 2025 introduces a suite of new functionalities and capabilities designed to optimize data center management, enable a flexible cloud experience across diverse environments, and bolster security features.

PRIMERGY Server & Windows Server 2025

This future-ready solution caters to organizations of all sizes—whether a large enterprise with multiple sites or a small to medium-sized company with limited space and budget.

Find out in our new video how the combination of PRIMERGY and Windows Server 2025 offers the versatility and flexibility to turn your IT infrastructure into the business enabler you've always envisioned.

Enjoy supreme performance and flexibility

- Benefit from optimized Storage capabilities, leading to significant cost savings and improved storage efficiency.
- Enjoy improved graphics efficiency and scalability, by leveraging GPU Pools to share GPUs across multiple VMs for better graphics performance. Live migration between servers and support for larger VMs enable handling more demanding workloads.
- Experience faster, more reliable data processing and easier access to information, ensuring smooth and secure system performance without extra strain.
- Enhanced protection of sensitive data with improved encryption and automatic security measures, ensuring overall system safety and reliability and preventing business disruptions due to attacks.

Get the best hybrid cloud experience with Microsoft Azure

- Easily integrate on-premises servers into Azure, improving visibility and streamlining cloud migration for SMEs and IT departments.
- Seamlessly transfer workloads between on-premises and cloud with unified management, ideal for hybrid enterprises and disaster recovery.
- Streamline the management of workloads with enhanced flexibility, perfect for IT administrators and remote teams.
- Run and manage container-based applications in hybrid environments, providing scalable and flexible management for DevOps teams and microservices.

Trust the system to trust no-one

- Simplify business security from the start with over 350 preconfigured settings, aligning with Microsoft and industry best practices for devices and VM roles.
- Enhanced productivity with Live hotpatching, installs security patches without requiring a reboot, enabling uninterrupted work for your team.
- Empower workers with enhanced security and seamless access to remote desktops, mobile devices, and cloud resources, boosting productivity anywhere.
- Optimize the performance of crucial developer workload with Dev Drive, utilizing ReFS technology offers advanced control, security settings, and administrative management for development teams and IT administrators.

Future-proof your infrastructure with improved resource utilization

- Fully compatible with the latest technologies, it allows you to Integrate your own applications and cloud services via modern API interfaces enhancing flexibility and enabling faster development cycles.
- Exploring new possibilities, it is optimized for all workloads including data-intensive applications such as AI, machine learning, and big data. Companies can strengthen their innovations and handle complex data processing with ease, unlocking new business areas.
- Simplify work with consistent UI features and enhanced app compatibility, reducing the learning curve for new software and increasing efficiency and satisfaction in the workplace.
