The TUF Gaming ARGB PWM Fan Hub is an all-in-one PWM fan controller and ARGB controller with support for up to six fans, empowering you to ramp up cooling as temperatures rise and keep all your ARGB lighting effects effortlessly synchronized.

Lights to Show What's Up

Operational Indicators

When a fan is plugged into this hub, the corresponding port will light up, providing clear indicator lights.

Keep It Stable

Dual SATA Power Inputs

Stable power input via dual SATA ports directly from the PSU, ensuring a stable and consistent power supply for optimal performance.

Safety Fuses

Overcurrent and short-circuit protection enhanced by safety fuses to safeguard your build and ensure uninterrupted performance and longevity.

Magnetic Mounting

Equipped with two magnets to easily attach to the metal surface on the case for easy installation.
