Discover ways to work healthier

Studies suggest that switching from sitting to standing offers several health benefits and can increase productivity. With the IB-EW206B-T, you can now easily achieve the perfect balance between sitting and standing throughout the workday. We have the simple option to create a high quality sit/stand desk solution if you want a solution without unnecessary accessories and high costs. It is perfect for offices, schools, homes and most workspaces and integrates your existing tabletops.

Easy control

We have the powerful, smooth-running, stable, quiet and continuously adjustable table base with two motors for trouble-free height adjustment with up to 38 mm per second lifting speed. 3-stage

extendable table legs provide a split-second transition from sitting to standing at the touch of a finger. Thanks to the digital LED control unit, adjustments can be made at the touch of a button. Three programmable memory presets store your desired height settings and provide automatic reminders to switch between standing and sitting for regular exercise.

Dual electric lift system

The sturdily built steel table legs are adjustable via a telescopic height adjustment. This ensures that the transition to your ideal, ergonomic position is made in seconds with a simple touch.
The dual motor offers better stabilisation, higher load capacity and low running noise, so you can go about your work undisturbed.
