The ASUS Room Kit for Google Meet hardware kit delivers vivid and smooth videoconferencing in stunning HD. It's easy to set up and supports meeting rooms of all sizes, from small huddle rooms to large conference rooms, ensuring seamless conferencing experiences for all participants.

At the core of this package is the slim and powerful ASUS Room Kit compute system for Google Meet. Powered by a 13th Gen Intel® Core™ processor, it delivers exceptional 4K video and high-quality audio. The expandable speakerphones included in the kit enable crystal-clear conversations by eliminating echoes and noise. Additionally, the 4K UHD camera with AI-powered auto-framing allows for masterful presentations, while the touchscreen control panel and remote control enable effortless meeting moderation.
