Aluminium wireless presenter with red laser, to control your presentations

Stay in control

Giving a presentation has become really easy with the Kazun Aluminium Wireless Laser Presenter. By being completely in control of your presentation, you can focus on your story and audience.

Take it with you

The strong and ultra-slim design of the aluminium body feels comfortable in your hand and makes sure you can take the presenter with you, everywhere you go.

Highlight your presentation

The Kazun Presenter includes four PowerPoint functions: you can easily start and stop your presentation, go to the next and previous slide or go to a black screen. The red laser pointer can be used to emphasize important aspects of your presentation, ensuring that your audience knows exactly what you are talking about.

Plug & Play wireless receiver

When you’re ready to begin your presentation, simply plug the USB micro receiver into your PC or laptop (also compatible with Mac*) and you can start right away. The wireless receiver has an extra-long range of up to 30 meters, allowing you to move around freely while talking to your audience. The battery can be charged with the included micro-USB cable.
