

Verbatim M.2 NVMe SSD Enclosure Kit

Model: 32261

Manufacturer: VERBATIM

EAN: 023942322610

Product Code: 1644126

R851

High-Speed Performance

The Store 'n' Go M.2 NVMe SSD enclosure is designed to unlock the full potential of NVMe technology, delivering fast and reliable performance for demanding storage tasks. With data transfer rates of up to 10Gbps and read/write speeds reaching up to 1000MB/s*, it is ideal for transferring large files, backing up data or expanding storage for laptops and desktop PCs. Whether used for work, creative projects or general file storage, this enclosure provides a smooth and responsive external SSD experience in a compact, portable form.

No Tools Required

Creating your own external SSD has never been easier. The Store 'n' Go enclosure features a tool-free design, allowing you to install or replace your M.2 NVMe SSD in seconds. Simply open the enclosure, insert your SSD, secure with the rubber plug and close it again – no screws or tools

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

needed – perfect for users who want flexibility, quick upgrades or an easy way to repurpose an existing NVMe SSD. Power is supplied directly via the USB port, so no external power supply is required. The pack also includes a heatsink that can be attached to the SSD if required to help maintain optimal operating temperatures.

Broad Compatibility

The Store 'n' Go enclosure supports NVMe PCIe SSDs with M-Key or B+M Key connectors and accommodates a wide range of form factors, including 22 x 30 mm, 22 x 42 mm, 22 x 60 mm and 22 x 80 mm. This ensures compatibility with most common M.2 NVMe SSDs on the market. Please note that this enclosure does not support SATA III M.2 SSDs.

The enclosure also features a unique integrated red rubber cable tidy that allows the cable to be neatly secured to the enclosure during transport.

*For optimal performance, the enclosure should be connected to a USB 3.2 Gen 2 host controller or higher.
