Forged Carbon Fiber Magnetic Shifter

The magnetic shifters have a firm feeling with a forged carbon fiber design. The contactless photoelectric technology makes the paddles extremely stable and ensures you never miss a shift.

RGB Sequential Shifter Light Indicator

The CS features 10 RGB LED sequential shift lights with 7 adjustable colors, allowing racers customize the rev speed lighting.

Programmable Mechanical Key Buttons

6 programmable key buttons with tactile feedback.

2 Pressable Universal Joysticks

With two joysticks available that could simulate 10 keys and 2 sets of cross keys, the CS wheel can handle complex operations in racing games.

MOZA Invisible Connect Wireless Technology

MOZA's 2.4G wireless signal technology allows for easy hassle-free racing, which has proven to provide longer service life and greater stability than wired transmission through thousands of hours of testing.
