Moza Racing Universal Mounting Plate Handbrake plate

Model: RS089

Manufacturer: MOZA RACING

EAN: 6973137270919

Product Code: 1649658

R1,481

Precision-Mounted, Perfectly Aligned

Experience the ultimate in flexibility and stability with the MOZA Universal Mounting Plate. Whether you're building a sim racing rig or a compact flight setup, this dual-device solution delivers seamless integration, ergonomic adjustability, and rock-solid durability—crafted for performance without compromise.

Durable High-strength Steel Construction

The Universal Mounting Plate is constructed from high-strength steel, ensuring excellent load-bearing capacity and structural rigidity.

Compatible with MOZA Flight Gear & Third-Party Accessories

Pre-drilled holes are included for certain MOZA flight sim gear intended for tabletop setups. The plate also supports selected third-party handbrakes and shifters.

Dual Mount Design, Streamlined Setup

Mount your handbrake and shifter on a single bracket. With its ambidextrous layout, it's perfect for both left-and right-hand drive configurations—maximizing performance, minimizing footprint.

Versatile Mounting Options

It supports various mounting methods, including tabletop clamping (requires the AB9 clamp, sold separately), 40mm aluminum profile mounting, and custom DIY setups.

Adjustable Height & Handbrake Angle

When paired with the AB9 clamp, users can fine-tune the mounting plate height, with the side bracket providing extended adjustment range. The mounting surface height is adjustable between 84mm and 122mm. For aluminum profile rig or DIY installations, users have full flexibility over height. The dedicated HBP handbrake mount offers three angle options in 9° increments (with 20mm spacing), allowing for optimal alignment based on user preference.
