

LogiLink NP0066 patch panel 0.5U

Model: NP0066

Manufacturer: LOGILINK

EAN: 4052792050530

Product Code: 1652692

R1,003

Compact small distribution panel for installation in a 10 "wall cabinet, ideally suited for the transmission of digital and analogue voice, image and data signals of class E (250 MHz) or EA (500 MHz). Combined with the appropriate data cables, this patch panel is suitable for all Ethernet applications including 10 Gigabit Ethernet, PoE and PoE +. Very high port density due to half height (0.5 HE).

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
