**Patch cable Ultraflex, Cat.6A, S/FTP, blue, 20 m" from
LogiLink Professional**

The certified LogiLink Cat.6A patch cable is ideal for data transfers up to 10 Gigabit Ethernet and transfer frequencies up to 500 MHz. The jacket is halogen-free and flame retardant, the copper wires are shielded in pairs, the overall shield is made of copper braid. The shielded RJ45 plugs come with an overmoulded slim strain relief and snagless design.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
