Product information "Speaker floor stand for SONOS ERA 100 & 300, 682-1068 mm, max. 5 kg, black" from LogiLink

Enhance your listening experience and seamlessly integrate your Sonos Era 100 & 300 speakers into your living space with the LogiLink speaker floor stand. Flexibly adjustable in height from 682 to 1068 mm to adapt to your environment for an optimal listening experience. The very stable and flat base plate can be partially slid under almost any piece of furniture for a better listening experience. Made of sturdy metal with a maximum load capacity of 5 kg, it protects your speaker from falling thanks to a secure mount.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
