The 12-digit AS-2200 is designed with both style and practicality in mind. The sleek and curved body not only looks professional, it also fits neatly on a desk or shelf.

Adjustable tilt display

A large, clear and adjustable LCD display panel minimises glare and reflection. For optimum legibility the panel can be tilted to suit any lighting conditions.

Eco-conscious design

Style doesn’t come at an environmental cost. The upper and lower cases of the AS-2200 are manufactured from Canon copiers recycled materials and the battery is mercury-free. It’s the ideal solution for organisations with a Green Procurement Policy – as well as for all responsible enterprises, educational institutions and environmentally conscious individuals.

Energy efficient

Dual power source- solar and mercury-free battery ensures energy-efficiency and reliable use under different lighting conditions. When the AS-2200 is not in use, an ‘auto power-off’ function simply switches the calculator off to save energy.

Comprehensive functions

The AS-2200 calculator offers an extensive range of functions. A slide switch provides easy decimal point selection and rounding. The Grand Total memory automatically accumulates totals. Other convenient keys include Mark-up, Reverse and all the regular functions you’d expect from a Canon calculator.
