Charge and sync your USB 2.0 Micro-B devices from a USB-C host, with reduced clutter

This USB-C™ to Micro-B cable lets you charge and sync your USB 2.0 Micro-USB mobile device from a USB Type-C™ laptop, USB-C wall charger, car charger or power bank.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The cable also lets you connect an external Micro-USB drive for easy data backups.

Charge and sync your mobile devices while you're on the road

This non-standard 0.5-meter cable is great for close-range connections to charge and sync your Micro-USB mobile devices with your laptop.

You can also use the cable to charge your devices from a USB-C wall charger, car charger or power bank -- perfect for people on the move, for providing simple, tidy connections.

Back up your data while you're in the field

The cable can also be used to back up data from your USB-C or Thunderbolt™ 3 computer to an external Micro-USB 2.0 drive. The short cable lets you set up in small offsite workspaces, or in a coffee shop or hotel room, so that you can install your equipment without excess cable getting in your way.

Keep as a spare while you're traveling

Replace the USB-C charging cable that came with your device, or keep one as a spare while you're traveling, so that all of your devices will be ready to use whenever you need them while you're on the road.
