MOVA X4 Pro Cordless Upright Vacuum with Mop

The MOVA X4 Pro Cordless Upright Vacuum Cleaner with Mop is an impressive achievement in the field of home cleaning. Its exceptional suction power (20,000 Pa), advanced hot-water cleaning technology (up to 80°C while mopping and as high as 100°C when cleaning the brush), smart self-cleaning, quiet drying, and convenient operation make daily home cleaning easy, fast, and extremely effective. If you’re looking for perfect cleanliness, the highest level of hygiene, and unparalleled convenience, the MOVA X4 Pro is the perfect choice. Get ready for a whole new dimension of cleaning—enjoy fresh, streak-free floors and time for yourself, while the MOVA X4 Pro takes care of the rest!

Revolutionary Hot Water Floor Cleaning Technology

The MOVA X4 Pro uses heated water (up to 80°C) while mopping, which means dirt dissolves faster and stain removal is up to ten times more effective compared to traditional methods. The

SpotHeat™ technology further enhances this process by directing an intense spray of hot water at 20,000 Pa onto stubborn stains. During cleaning, the device continuously supplies clean hot water to the brush surface—ensuring the floor is effectively cleaned with every pass, resulting in a perfect finish and complete hygiene.

Thorough Floor Cleaning

A powerful motor running at 104,000 rpm delivers 20,000 Pa of suction power. The MOVA X4 Pro easily handles everything from fine dust, pet hair, and crumbs to wet messes and dried-on stains. Thanks to the 180° Lie-Flat Reach feature, the device can reach under furniture and into low spaces, collecting dust, hair, and crumbs from hard-to-reach corners. The built-in Liquid Locking system protects the motor from dirty water backflow and maintains consistent suction power even when operating in a horizontal position. Integrated LED lighting on the head helps reveal hidden dirt and dust—even in dimly lit areas.

Advanced Technologies

An innovative system prevents hair from tangling in the brush. A finely serrated scraper and a “comb-like” design effectively collect hair, instantly removing it and pushing debris out of the brush. The specially designed double-edged brush allows for thorough cleaning along walls and baseboards, leaving not a speck of dust or dirt behind.

Smart and Convenient Self-Cleaning

The base station is designed so that you can slide the vacuum cleaner into the base without having to lift or rotate it. Even with a full water tank, the device can be easily returned to its docking station. The MOVA X4 Pro automatically washes the brush at a very high temperature (100°C), ensuring effective removal of heavy dirt and disinfection. The five-step cleaning process (immersion, washing, wringing, suction, and bidirectional scrubbing) ensures perfect hygiene without any effort on your part! Dirt sensors automatically check whether the brush is perfectly clean after washing. If the system detects any remaining dirt, it performs an additional rinse to ensure you always have perfectly clean results.

Effective drying—caring for your brush and maintaining hygiene

Choose from two drying modes to adjust the time and intensity to your needs. The MOVA X4 Pro dries the brush with hot air at 90°C, which eliminates the risk of bacterial growth and unpleasant odors. The device automatically determines whether to dry the brush for 15 or 30 minutes, depending on the moisture level, all thanks to the Auto-Adjust Drying Time feature. Thanks to its sealed design, both Smart Drying mode (55 dBA) and the Rapid Drying mode (63 dBA) operate so quietly that you can watch your favorite TV show without having to turn up the volume. In addition to hot air, the drying process utilizes centrifugal force, which results in even faster and more efficient removal of water from the brush.

Reliable Heat Resistance

The MOVA X4 Pro is equipped with advanced components resistant to high temperatures. Both the brush and the special scraper are designed to handle water and air at temperatures up to 100°C, while maintaining durability and high efficiency.

Comfortable operation and long runtime

Thanks to its light weight (5.3 kg) and ergonomic handle, the vacuum cleaner is comfortable to use. Additional mini wheels make it easy to move forward and backward—especially when working in lie-flat mode (180° Lie-Flat Reach). The 60° swivel head allows you to easily navigate around table legs, chair legs, and other obstacles. This makes cleaning simpler and more precise. In addition, the device automatically adjusts suction power to the level of dirt on the floor. This saves energy without compromising cleaning effectiveness. The vacuum cleaner features a powerful battery pack that provides up to 45 minutes of uninterrupted operation. You can clean your entire apartment with confidence, without worrying about the device suddenly running out of power.

Intuitive vacuum cleaner controls and docking station

During operation, clear messages appear on the LED display, and built-in voice notifications will inform you of the device’s status—for example, when the dustbin needs to be refilled or emptied. This ensures full control and convenience while cleaning. Additionally, the vacuum’s base is designed so you can slide the MOVA X4 Pro onto the docking station with a single motion, without having to lift the device or pour out water. The docking station stays clean, and the vacuum automatically turns off, begins charging, and is ready for self-cleaning.
