MOVA V50 Ultra Robot Vacuum Cleaner (white)

Model: RLV72LE

Manufacturer: MOVA

EAN: 6977728943770

Product Code: 1663979

R13,596

MOVA V50 Ultra Cleaning Robot (White)

The MOVA V50 Ultra is a cleaning robot that vacuums, mops, and cleans the mop pads for you. With its high suction power (24,000 Pa) and intelligent dirt detection feature, it thoroughly removes dirt from various surfaces. It recognizes over 200 types of obstacles, and thanks to voice commands and Matter support, you can control it easily and conveniently.

Hot-Water Mopping

The robot mops floors using water heated to 50°C, which effectively dissolves dried-on stains and dirt. Thanks to the DuoSolution system, the robot uses two separate tanks: one contains a standard cleaning solution, while the other holds a liquid that neutralizes pet odors in the home.

Multifunctional docking station

The base station handles all tasks: it automatically fills the robot’s water tank, empties the dust bin, cleans the mop pads, and dries them with hot air (60°C). The built-in OmniDry™ system also dries the dust bin and bag, preventing mold growth and unpleasant odors. Additionally, the entire unit is sterilized with UV light, which eliminates as much as 99.99% of bacteria. This solution ensures cleanliness and hygiene without the need for manual cleaning of the device’s components.

High Suction Power and a Self-Cleaning HEPA Filter

The MOVA V50 Ultra is equipped with a TurboForce7 motor that operates at 24,000 Pa. Thanks to this, the robot thoroughly picks up not only dust but also larger debris. Importantly, after each cycle, the charging station uses a special HEPA filter cleaning system that removes debris from the filter using a stream of air. As a result, the robot maintains consistent suction power, does not lose performance, and does not require frequent filter removal for manual cleaning.

Adaptable to Any Surface

The MOVA V50 Ultra automatically adjusts its operation to the surface it is moving on. It can lift its brushes (the side brush up to 10 mm, the main brush up to 5 mm) and mop pads (up to 10.5 mm) when it drives onto a carpet, so you don’t have to worry about spills. When the robot returns to a hard floor, the mops are automatically lowered. Additionally, the FlexiPress system controls the mop’s pressure on the floor and allows it to tilt slightly by 5°—this ensures better contact with the surface even on uneven floors.

Smart Dirt Recognition

Using an RGB camera and optical sensors, the robot can distinguish between different types of dirt—from dry crumbs to wet stains to sticky and greasy messes. It then automatically adjusts its cleaning method: it increases power on carpets, mops the area again, or avoids certain spots if a pet is present. This makes cleaning more effective.

Ideal for Homes with Pets—Pet Care System

The MOVA V50 Ultra works great in homes with dogs, cats, or other pets. It creates separate zones for your pets’ activity and cleans them with greater precision. It also lets you monitor your pet

remotely via the app and records footage of its movements. The system can also detect heavier dirt, such as pet hair or food scraps, and activate a more powerful cleaning mode.

Navigating Thresholds and Cleaning Hard-to-Reach Areas

The robot is equipped with the StepMaster system and uses automatically extending legs to navigate thresholds, baseboards, and other obstacles up to 6 cm high. With a height of just 89.5 mm, it can fit under couches, beds, and other furniture. This allows it to clean areas that a regular vacuum cleaner often can’t reach.

Advanced Navigation

The SmartSight AI system, featuring Structured Light technology and a side-mounted laser, enables the robot to recognize over 200 types of obstacles—from shoes and cables to chair legs. Built-in LED lighting helps detect objects even in low light. The robot navigates around obstacles with high precision and cleans even in challenging lighting conditions.

Efficient cleaning without hair tangles

The TroboWave DuoBrush system effectively picks up hair and pet hair while preventing tangles. The special brush design and an additional brush near the wheel eliminate hair buildup. Debris pickup efficiency exceeds 99.9%, which is especially important in homes with pets.

Voice Control and Smart Home Integration

The MOVA V50 Ultra supports voice commands—simply say “Hey, MOVA” to start cleaning or select settings for a specific room. The V50 Ultra also supports the Matter standard (available via an OTA update), enabling easy integration with other smart devices in your home.

Included in the set

- cleaning robot
- docking station
- extension plate for the docking station

- user manual
- automatic cleaning solution dispenser module (installed)
- mop pad holders x2 (installed)
- docking station filter (installed)
- dust bags x2
- mop pads x2
- cleaning solution 1 L
- pet odor neutralizer 200 mL

Manufacturer	MOVA
Model	V50 Ultra
Battery capacity	6,400 mAh
Suction power	24,000 Pa
Dust bin capacity	300 ml
Water tank capacity	70 ml
Operating time	Vacuuming and mopping: 40 min (quiet)/130 min (standard)/130 min (high)/110 min (extremely); vacuuming: 220 min (quiet)/190 min (standard)/160 min (high)/120 min (extremely)
Mopping function	Yes (mopping pads)
Self-cleaning function	Yes
Navigation system	FlexiRise™ Navigation
Filter type	EPA (E11)
Compatibility	Google Home/Siri/Alexa/direct voice call
Dirty/clean water tank capacity in the docking station	4 / 3.5 L

Gross weight: 22500, Net weight: 14250, Box length: 60,50, Box width: 49,50, Box height: 50,00, Pojemność akumulatora: 6400, Operating time (min): 170, Dust container capacity (l): 3.2, Suction power (Pa): 24000, Water container capacity (l): 4, GPSR Link: https://psr-assets.innpro.pl/small_appliances/sg_small_appliances_vacuum_cleaners.pdf, Stan: Nowy, Stan
