MOVA Shine 20 hair dryer (gold)

Model: AMSH20

Manufacturer: MOVA

EAN: 6977728944456

Product Code: 1663982

R3,447

MOVA Shine 20 (gold) hair dryer

Create a ritual to take care of your hair and scalp. Designed with every member of the family in mind, the MOVA Shine 20 hair dryer uses an advanced brushless motor, and with airflow up to 65 m/s, you can dry strands even faster while limiting heat exposure. The intelligent temperature control system with TOF technology automatically adjusts the heat according to the distance from your head, protecting the delicate hair structure. Thanks to ionization, you'll regain smoothness and shine, and the quiet 58 dB operation means you can use the device even late at night without disturbing your home.

Fast drying without overheating

Save time before you leave the house. The airflow speed of 65 m/s and efficient brushless motor allow you to shorten the drying process and reduce heat stress on your hair. The MOVA Shine 20 dryer dries short hair in just about 40 seconds, medium-length hair in about 2 minutes, and long hair in about 4 minutes. Choose from 3 airflow speed settings and 4 temperature levels to customize the

device's performance according to the density, length and needs of your hair.

Smart hair protection

The MOVA Shine 20 dryer uses 2 advanced sensors that work together to protect your hair and scalp. The TOF (Time of Flight) sensor monitors the device's distance from your head and automatically adjusts the strength and blowing temperature to maintain an optimal temperature of 55°C and prevent dry hair and skin irritation. At the same time, the NTC sensor continuously measures the air temperature at the outlet as many as 1,000 times per second, immediately reacting to any fluctuations and protecting against overheating and heat damage. This allows you to use the device without worrying about their condition, protect the hydrolipid barrier of the scalp and preserve moisture in the hair structure, which is crucial in the care of highly porous strands.

Ionization for smoothness

The ionization technology in MOVA Shine 20 reduces static and smooths the surface of hair, so strands stay light and supple, and you don't have to worry about frizz even on humid days. The device emits up to 300 million negative and positive ions, which help retain moisture inside the hair, reduce static and eliminate unpleasant odors, leaving your hair smooth, soft and full of shine.

Comfort with AeroBlossom

AeroBlossom technology breaks up large air whirls into smaller ones, allowing for even airflow and a stable, pleasant temperature during drying. This avoids overheating strands in one spot, and the airflow is gentle, comfortable and tailored to your everyday hair care.

Styling on your terms

You'll find a round shaping brush, a concentrator and a special nozzle that allow you to create curls, lift hair at the roots or achieve a smooth finish to your style. Four operating modes and automatic temperature control allow you to adjust the dryer's action to your hair's needs. With MOVA Shine 20, you'll get salon-like results at home!

A choice for the whole family

Thanks to intelligent nozzle recognition and automatic mode adjustment, the MOVA Shine 20 hair dryer works well for every member of the family - from children to adults. You'll find a concentrator included that lets you dry short hair in 40 seconds while reducing frizz. The round brush will help create volume, soft waves or light curls, giving hair shine and lightness without frizz. A special nozzle for children generates a gentle 40-50°C airflow that is quiet and safe, making daily drying of toddlers' hair comfortable and enjoyable.

Quiet operation and lightweight design

MOVA Shine 20 weighs only 430 g and operates at a volume of 58 dB, allowing you to dry comfortably without straining your wrist or generating noise. Take care of your hair even while you're watching your favorite TV show, and see how grooming can be a natural, enjoyable part of your day.

Included:

- Hair dryer
- Round shaping brush
- Concentrator
- Nozzle
- User manual
