Product Code: 1663984

R3,899

MOVA Master 10 Hair Dryer (Silver)

The MOVA Master 10 reduces drying time thanks to an airspeed of 55 m/s and a motor reaching 110,000 RPM, delivering an airflow of 50 m³/h while remaining quiet (58 dB). Thanks to advanced ionization technology, it eliminates frizz and static, leaving hair soft and shiny. Its lightweight design (292 g), 2.8-meter cord, and the ability to switch between styler and dryer modes make daily hair care exceptionally convenient. The set includes a storage box and as many as 8 accessories that let you dry, smooth, style, and create waves and curls.

Speed Without Overheating

A powerful motor running at 110,000 RPM and an airflow of up to 55 m/s allows you to quickly dry even thick, long hair, shortening styling time and reducing heat exposure to your strands. An airflow rate of 50 m³/h boosts the device's efficiency, allowing you to achieve the desired result in less time.

Smart hair protection

The MOVA Master 10 hair dryer uses an advanced NTC sensor that monitors air temperature 1,000 times per second, automatically adjusting the heat level to maintain a constant, safe temperature and protect hair from overheating and heat damage. As a result, your hair retains a healthy appearance, and its structure and natural moisture remain intact even with daily use.

Ionization for a Smooth Finish

Thanks to its ionization technology, the MOVA Master 10 neutralizes static electricity and smooths the hair's surface, preventing frizz even in high humidity. Your hairstyle stays soft, shiny, and flexible, and you can enjoy a well-groomed look every day.

Styling Without Overheating

Coanda Airflow technology allows the MOVA Master 10 to style hair with a stream of air, creating bouncy waves and curls at a lower temperature, which reduces the risk of heat damage and helps maintain healthy-looking hair. Your hair naturally wraps around the barrel thanks to the force of the airflow, allowing you to safely create curls even with thin and delicate strands.

Curling and smoothing

The conical curling nozzles (right and left) let you quickly create natural, bouncy waves and curls without high heat, while the smoothing nozzle helps tame flyaways and achieve a sleek finish. The airflow gently wraps the strand around the nozzle, allowing you to safely style your hair at home.

Versatility Thanks to Accessories

The set includes as many as 8 accessories—conical curling nozzles (right and left), a smoothing nozzle, a comb, a round styling brush, a diffuser, a concentrator, and a quick-dry nozzle. The Smart Nozzle Recognition feature detects the attached attachment and automatically selects the appropriate operating mode, allowing you to start styling right away without manually adjusting settings. If you change the temperature or airflow speed for a given attachment while using it, the Mode Memory feature will save these settings and automatically restore them the next time you use

the same accessory, making your daily styling routine easier.

Lightweight and Quiet

The MOVA Master 10 weighs just 292 g, allowing for comfortable styling without straining your wrist. Its quiet operation (58 dB) lets you dry your hair even in the evening without disturbing other household members.

Styling on Your Terms

The device offers 4 temperature settings, 3 airflow speed levels, and a cool air option, giving you full control over your styling regardless of your hair type. The MOVA Master 10 features a rotary switch to transition from styler mode to dryer mode, allowing you to seamlessly adapt the device to your current needs.

Smart Energy Saving

Thanks to its built-in accelerometer, the MOVA Master 10 detects when the device is in a horizontal position, automatically pausing the heating and reducing the airflow. The "Flat Down, Power Down" feature saves energy and reduces noise during styling breaks, enhancing user comfort.

Included:

- Hair dryer
- Conical curling nozzle [right and left] x2
- Smoothing nozzle
- Comb
- Round styling brush
- Diffuser
- Concentrator
- Quick-dry nozzle
- Storage case
- User manual
