MOVA Master 10 Hair Dryer (pink)

The MOVA Master 10 reduces drying time with an air speed of 55 m/s and a motor that reaches 110,000 RPM, delivering 50 m³/h performance with quiet operation (58 dB). With advanced ionization technology, it eliminates frizz and static, leaving hair soft and shiny. The lightweight design (292 g), 2.8 m cable and the ability to rotate from styler to dryer mode make daily grooming extremely convenient. You'll find a storage box and up to 8 accessories for drying, smoothing, shaping and creating waves and curls.

Speed without overheating

The powerful 110,000 RPM motor and airflow reaching 55 m/s allow you to quickly dry even thick, long hair, reducing styling time and limiting exposure of strands to heat. A capacity of 50 m³/h increases the device's efficiency, allowing you to get the desired effect in less time.

Intelligent hair protection

The MOVA Master 10 dryer uses an advanced NTC sensor that monitors the air temperature 1,000 times per second, automatically adjusting the heat level to maintain a constant, safe temperature and protect hair from overheating and heat damage. As a result, the hair retains a healthy appearance, and its texture and natural moisture content remain intact even with daily use.

Ionization for a smooth effect

Thanks to ionization technology, MOVA Master 10 neutralizes static and smooths the hair surface, preventing frizz even in high humidity. Hairstyle stays soft, shiny and flexible, and you can enjoy a well-groomed look every day.

Styling without overheating

With Coanda Airflow technology, the MOVA Master 10 styles hair with airflow to create bouncy waves and curls at lower temperatures, reducing the risk of heat damage and keeping your hair looking healthy. The hair itself wraps around the attachment thanks to the force of the air, allowing you to safely form curls even with thin and delicate strands.

Versatility with accessories

You'll find up to 8 accessories in the kit - conical curl nozzles (right and left), a smoothing nozzle, a comb, a round shaping brush, a diffuser, a concentrator and a nozzle for quick drying. The Smart Nozzle Recognition function recognizes the nozzle you put on and automatically selects the appropriate mode for it, allowing you to start styling right away without manually adjusting parameters. If you change the temperature or blowing speed for a particular tip during use, the Mode Memory function remembers these settings and restores them automatically the next time you use the same accessory, making everyday styling easier.

Lightweight and quiet

The MOVA Master 10 weighs just 292 grams, allowing for comfortable styling without straining the wrist. Quiet operation (58 dB) allows you to dry your hair even in the evening hours without

disturbing other household members.

Styling on your terms

The device offers 4 temperature settings, 3 levels of airflow speed and a cold blow option, allowing full control over styling regardless of hair type. The MOVA Master 10 offers a rotating function to switch from stylist mode to dryer mode, allowing you to seamlessly adjust the device to suit your current needs.

Intelligent energy saving

With its built-in accelerometer, the MOVA Master 10 detects the device's horizontal position, automatically stopping heating and reducing airflow. The Flat Down, Power Down function saves energy and reduces noise when styling is interrupted, increasing user comfort.

Included:

- Hair dryer
- Tapered curl nozzle [right and left] x2
- Smoothing nozzle
- Comb
- Round shaping brush
- Diffuser
- Concentrator
- Quick drying nozzle
- Storage box
- User manual
