MOVA Z60 Ultra Roller Complete Cleaning Robot (Black)

The MOVA Z60 Ultra Roller Complete will help you thoroughly clean the floors in your home. With suction power of up to 28,000 Pa, intelligent carpet detection, and the ability to clean various surfaces, this device handles both dust and stubborn dirt. Its slim design, precise navigation, and advanced features allow this model to effectively clean even hard-to-reach areas, while ensuring the safety and cleanliness of every surface—from hardwood floors to carpets.

Effective mopping without streaks or residue

The integrated HydroForce™ mopping system features a 25.6 cm rotating roller that continuously sprays the floor with clean water while collecting dirt into a separate tank. This solution allows for

thorough cleaning without smearing dirt or risking secondary contamination. Thanks to self-cleaning technology, the mop maintains high performance even with heavy use.

Protecting Carpets from Moisture

Thanks to AutoShield™ Tech, the Z60 Ultra Roller intelligently detects carpets and automatically raises the mop by 14 mm, while lowering a special shield that protects the surface from getting wet. This keeps carpets dry and clean, so you don’t have to worry about water marks or stains.

Thorough cleaning of corners and edges

Thanks to a mechanically extendable roller and a side brush mounted on a movable arm, the robot reaches hard-to-reach areas such as corners, spaces under furniture, and around chair legs. MaxiReach™ Tech allows for even more thorough removal of dust, hair, and other particles, with nearly 100% edge coverage.

28,000 Pa of suction power

At the heart of the device is the TurboForce9™ motor, which generates up to 28,000 Pa of suction power while maintaining a low noise level. Four suction intensity levels let you adjust the suction power to the type of floor or the level of dirt, ensuring effective cleaning on both hard surfaces and carpets.

Effortless Pet Hair and Human Hair Removal

The dual TroboWave™ brush is designed with pet-owning households in mind. By combining nylon bristles with flexible TPU material, the robot effectively picks up pet hair, human hair (up to 30 cm long), and fine debris, while preventing them from getting tangled in the brushes. This ensures effective and hassle-free cleaning.

It easily navigates thresholds and carpets

Thanks to the improved StepMaster™ 2.0 mechanisms, the robot effortlessly navigates obstacles up to 8 cm high, including thresholds, door tracks, and soft carpets. The LiftPro™ system independently

controls the three wheels, allowing the entire unit to be lifted evenly, which ensures smooth movement even on uneven terrain.

Cleaning in Tight Spaces and Open Areas

Thanks to its low profile (96 mm) and DToF technology, the robot easily fits under low furniture and navigates effectively in tight spaces. In open spaces, the DToF sensor automatically raises, allowing the robot to perform a full 360-degree scan of its surroundings and precisely map rooms.

DuoSolution™ – a system with 2 cleaning solution tanks

The device is equipped with two separate solution tanks: one for standard cleaning solution and the other for specialized detergents, such as those designed to eliminate pet odors. Automatic liquid level detection and the ability to manage cleaning modes via the MOVAhome app make the cleaning system more flexible and tailored to the user’s needs.

Included in the set

- cleaning robot
- docking station
- TroboWave DuoBrush main brush (1 installed, 1 spare)
- side brush (1 installed, 2 additional)
- dust bag and dust bag filter (1 installed, 3 additional)
- mop roller (1 installed, 3 additional)
- DuoSolution automatic cleaning solution dispenser (1 installed)
- surface cleaning solution 1000 ml x 1
- odor-eliminating solution 200 ml x 1

Manufacturer	MOVA
Model	Z60 Ultra Roller Complete
Color	Black
Battery Capacity	6,400 mAh

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice.
